## Mini-Quiz 8

BIOL 4350/6350

Mar. 21, 2019

- 1** In class, we discussed ideal allocation strategies for different environments. However, we know that multiple strategies exist. Why is this the case?
- 2** Similarly, how can two species with the same allocation strategy exist in the same environment?

**3** How might allocation patterns differ with ontogeny (i.e., the point in an individual's development)?
